

Tools for collecting data

- [AnswerGarden](#) - Real-time polling and brainstorming tool
 - [Backchannel Chat](#) - Teacher-moderated Twitter-type assessment tool for education
 - [Chatzy](#) - Lets students chime in with questions or opinions during a lecture
 - [Coggle](#) - Mind-mapping tool that lets you get a handle on student thinking
 - [eSurvey Creator](#) - Make student surveys and questionnaires fast
 - [Flipgrid](#) - Let students make quick videos that respond to teacher prompts
 - [Formative](#) - Give live assignments, grade them, and give immediate feedback
 - [Lino](#) - A sticky-note-based virtual blackboard that lets students chime in
 - [Naiku](#) - Make quizzes that students can take on mobile devices
 - [Pear Deck](#) - Create interactive presentations students can take part in via smartphones
 - [Plickers](#) - Collect formative assessment data in real time with no need for student devices
 - [The Queue](#) - Free educational chat tool that's similar to Twitter and facilitates remote class discussion
 - [Quizalize](#) - Create homework and quizzes quickly, with a fast-grading feature
-
- [Quizlet](#) - Develop tests, quizzes, flashcards, and study games for mobile
 - [Remind](#) - Send quick texts to students and parents to check for understanding
 - [Sparkpost](#) - Adobe app that lets teachers create exit tickets with visuals and graphics
 - [SurveyPlanet](#) - Create quick surveys to get a grasp on student knowledge
 - [Typeform](#) - Create polls with graphical elements
 - [VoiceThread](#) - Create discussions around documents, videos, and other materials
 - [Zoho Survey](#) - Make mobile-ready student surveys and get real-time results.

Thank you [Amanda McLoughlin](#) for many of these
